Special Notices.

Advertisements intended for the BEE JOURNAL must reach this office by Saturday of the previous week.

Ribbon Badges, for bee-keepers, on which are printed a large bee in gold, we send for 10 cts. each, or \$8 per 100.

Articles for publication must be written on a separate piece of paper from items of business.

Photographs of prominent Apiarists—Langstroth, Dzierzon, and the Baron of Berlepsch.—Price 25 cents each.

When changing a postoffice address, mention the old as well as the new address.

Constitutions and By-Laws for local Associations \$2.00 per 100. The name of the Association printed in the blanks for 50 cents extra.

The Color and Lustre of Youth are restored to faded or gray hair by the use of Parker's Hair Balsam, a harmless dressing highly esteemed for its perfume and purity. 49w4

A Sample Copy of the Weekly BEE JOURNAL will be sent free to any person. Any one intending to get up a club can have sample copies sent to the persons they desire to interview, by sending the names to this office.

It would save us much trouble, if it would be particular to give their post office address and name, when writing to this office. We have letters (some inclosing money) that have no name, post-office, County or State.—Also, if you live near one postoffice and get your mail at another, be sure to give the address we have on our list.

It will pay to devote a few hours in getting up a club for the BEE JOURNAL. Read the list of premiums on another page, and take advantage of the fall gatherings to get up clubs.

It is Worth Remembering that nobody enjoys the nicest surroundings if in bad health. There are miserable people about to-day with one foot in the grave, when a bottle of Parker's Ginger Tonic would do them more good than all the doctors and medicines they have ever tried. See adv. 49w4

We are sometimes asked who our authorized agents are? Every subscriber is such an agent; we have no others, and greatly desire that each one would at least send in one new subscriber with his own renewal for 1882. The next few weeks are the time to do this. We hope every subscriber will do his or her best to double our list for 1882.

Premiums.—Those who get up clubs for the Weekly BEE JOURNAL for 1882, will be entitled to the following premiums. Their own subscription may count in the club:

For a Club of 3, a copy of "Bees and Honey."
 " 4, an Emerson Binder for 1882.
 " 5, a Register for 50 Colonies, or Cook's (Bee) Manual, paper.
 " 6, " " " cloth.
 " 7, Weekly Bee Journal for 1 year, or Apiary Register for 200 Cols.

Or they may deduct 10 per cent in cash for their labor in getting up the club.

Binders for 1882.—We have had a lot of Emerson binders made especially for the BEE JOURNAL for 1882. They are lettered in gold on the back, and make a nice and convenient way to preserve the JOURNAL as fast as received. They will be sent post paid by mail for 75 cents. To all who send during this month (December) for the JOURNAL and binder for 1882, we will send both for \$2.50. We do this to encourage all to get the binder and preserve the BEE JOURNAL for reference, and to save us the expense of removing the name from our type mailing machine, and then resetting it in January or February.

Binders cannot be sent to Canada by mail—the International law will not permit anything but samples of merchandise of less weight than 8 ounces. Canadians will please remember this when ordering Binders.

Look at the wrapper label and see that proper credit is given for money sent us, within 2 weeks. If it does not then appear, please send us a Postal Card, and we shall with pleasure make the correction, for an error may occur during the rush at this season, though we endeavor to be careful to always give proper credit.

If any numbers of this year's BEE JOURNAL have been lost, look them over at once and send us a Postal Card stating the missing numbers and we will send them free, as long as we have any left.

Of the many Guides and Seed and Plant Catalogues sent out by our Seed and Nurserymen, and that are doing so much to inform the people and beautify and enrich our country, none are so beautiful, none so instructive as *Vick's Floral Guide*. Its paper is the choicest, its illustrations handsome, and given by the thousand, while its Colored Plates are gems. This work, although costing but ten cents, is handsome enough for a Gift Book, or a place on the parlor table. Published by James Vick, Rochester, N. Y.

BARNES' PATENT Foot Power Machinery

CIRCULAR and SCROLL SAWS.
 Hand, Circular Rip Saws for general heavy and light ripping, Lathes, &c. These machines are especially adapted to *Drive Making*. It will pay every bee-keeper to send for our 48 page Illustrated Catalogue.

Honey and Beeswax Market.

BUYERS' QUOTATIONS.

OFFICE OF AMERICAN BEE JOURNAL,
 Monday, 10 a. m., Dec. 31, 1881.

The following are the latest quotations for honey and beeswax received up to this hour:

CHICAGO.

HONEY.—The market is lively and prices steady. We quote light comb honey, in single comb boxes, 18622c; in larger boxes 2c. less. Extracted honey, 18622c; in small boxes, 18617c.

BEESWAX.—Prime quality, 18622c.

AL. H. NEWMAN, 972 W. Madison St.

NEW YORK.

HONEY.—The supply is full, and trade is lively. We quote as follows: White comb, in small boxes, 18622c; dark, in small boxes, 18617c. Extracted, white, 18611c; dark, 76c.

BEESWAX.—Prime quality, 219c.

THOMAS & CO., 11 and 13 Devos avenue.

BOSTON.

HONEY.—1-pound combs are a desirable package in our market, and a large quantity could be sold at 20622c, according to quality.

BEESWAX.—Prime quality, 22c.

CROCKER & BLAKE, 57 Chatham Street.

BALTIMORE.

HONEY.—But little on the market, and prices are not quoted.

BEESWAX.—Southern, pure, 216c; Western, pure, 216c; grease wax, 11c.—Baltimore Market Journal.

INDIANAPOLIS.

HONEY.—New, in 1 or 2 lb. sections, 22625c.—Indianapolis Stock Review.

PHILADELPHIA.

HONEY.—The supply and demand are alike nominal.

BEESWAX.—Best light 23625c.—Philadelphia Merchants' Guide.

CLEVELAND.

HONEY.—Comb honey has been a little dull for a week, but prices are unchanged. We sell best white 1 lb. sections at 22c, 24 best, 23c, and dark 18c; 2 lb. sections, 176c. Extracted, 12c. in small packages; 11c. in half bins.

BEESWAX.—22625c.

A. C. KENDEL, 115 Ontario Street.

ST. LOUIS.

HONEY.—Plentiful and slow for all save choice bright comb—this sold readily; comb at 18622c; strained and extracted 18611c to 126c.—top rates for choice bright in prime packages.

BEESWAX.—Selling lightly at 18623c.

R. C. GREER & CO., 117 N. Main Street.

SAN FRANCISCO.

HONEY.—The southern bent this week brought 108 cases, principally comb. It is next to impossible to find buyers at current figures, except where a case or two is retained to some small dealer. There would be no trouble in placing all offerings to wholesale buyers, if concessions were made, but this holders are endeavoring to avoid, at the same time being anxious to realize.

We quote white comb, 18620c; dark to good, 18614c. Extracted, choice to extra white, 84c; 10c; dark and candied, 78c. BEESWAX.—22625c.

STEARNS & SMITH, 425 Front Street.

CINCINNATI.

HONEY.—Our honey trade is a little slow just now, perhaps because of the unfavorable weather; but it has been first-class. My sales during two weeks in the month of October amounted to 22,000 lbs. of extracted honey—more honey than I ever sold in two weeks before. About 15,000 lbs. of the above was sold by the barrel, and almost all the balance in our square pound jars, and all these latter, with the exception of about 10 gross, were sold in our city, partly in shipping orders and partly in crates for the trade. Pound glass jars are by far the handsomest retail packages. They do not sell in Chicago nor in New York because adulterators have spoiled the retail trade especially for extracted honey. They used glass jars. But I don't wonder very much whether I should have created a retail market for extracted honey with the same success had I not adopted the square glass jar. I adopted it because adulterators were using the round bottles. For 10 and 25 lb. packages nothing is handier than tin buckets, and I have a good trade for them from druggists, bakers, retail grocers, etc.

I pay \$6.10 for extracted honey on arrival, and 10c. for choice comb honey.

BEESWAX.—18622c, on arrival. I have paid 25c. per lb. for choice lots.

C. F. MUTH.

ELECTROTYPES

Of Engravings used in the Bee Journal for sale at 25 cents per square inch—no single cut sold for less than 50c. THOMAS G. NEWMAN, 974 West Madison Street, Chicago, Ill.
